DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 13, 29 – 30 and 35 – 36, drawn to an absorbent core and an absorbent article comprising an absorbent core, classified in class 604, subclass 367.
- II. Claims 14 – 28, 31 – 32 and 37 – 42, drawn to a method for producing an absorbent core and an absorbent article comprising an absorbent core, classified in class 162, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by another and materially different process such as without compressing the wicking layer and in a different type of layer configuration.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3761

In the event that the applicant elects group I, the following election of species requirement applies:

This application contains claims directed to the following patentably distinct species of the claimed invention:

The pending claims recite several different types of hardwood fibers (i.e., eucalyptus, birch, aspen, maple, cotton wood, softwood fibers, etc.) and several types of articles (i.e., infant diapers, training pants, surgical drapes, etc.). The pending claims also recite the several storage layers including chemically treated cellulosic fibers, synthetic fibers, etc. and several acquisition layers including cross-linked cellulosic fibers and synthetic fibers. In each instance, the applicant should identify the desired embodiment to prosecute.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 29 is generic.

In the event that the applicant elects Group II, the following election of species requirement applies:

This application contains claims directed to the following patentably distinct species of the claimed invention:

The pending claims recite several different types of hardwood fibers (i.e., eucalyptus, birch, aspen, maple, cotton wood, softwood fibers, chemically treated softwood fibers, etc.) and several types of articles (i.e., infant diapers, training pants, surgical drapes, etc.). The pending claims also recite the several storage layers

including chemically treated cellulosic fibers, synthetic fibers, etc. and several acquisition layers including cross-linked cellulosic fibers and synthetic fibers. Additionally, the claims recite both a continuous process and an airlaid process and compression between a patterned compaction roll and a smooth roll and compaction between two patterned compaction rolls. In each instance, the applicant should identify the desired embodiment to prosecute.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 31 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Robert Sullivan on December 9, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
